

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A golf glove comprising:

a base part formed into glove shape; and

a filling part formed on a region corresponding to a groove between a thumb and an index finger, one portion of dorsal surface and palmar surface of the thumb and the index finger, and a lower part of the index finger and a thenar of the thumb of the palm, thereby providing a comparatively thicker area than a regular region of the base part corresponding to palmar surfaces of middle, ring, and little fingers ~~and a palm portion along the ring and little fingers,~~

wherein the filling part is not extended to an upper palm portion below the ring and little fingers.

2. (Original) The golf glove of claim 1, wherein the filling part is extended to a wrist portion on the base part.

3. (Original) The golf glove of the claim 1, wherein the filling part includes a soft implant material and the soft implant material is formed on one portion of the filling part.

4. (Original) The golf glove of the claim 3, wherein the soft implant material is formed using rubber, silicon or leather.

5. (Original) The golf glove of the claim 3, wherein the soft implant material is formed inside of the filling part.

6. (Original) The golf glove of the claim 1, wherein the filling part and the base part are formed in a body.

7. (Original) The golf glove of the claim 1, wherein the filling part is attached on the base part.

8. (Original) The golf glove of the claim 7, wherein the filling part is formed using at least one selected from a group consisting of leather, synthetic leather, and fabrics, so as to be attached on the base part by sewing or adhesion.

9. (Original) The golf glove of the claim 7, wherein the filling part includes a resin coating layer formed on the base part.

10. (Previously Presented) The golf glove of the claim 1, wherein the filling part is extended to a palmar portion of a second knuckle portion of the thumb portion.

11. (Currently Amended) A golf glove comprising:
a base part formed into a glove;
a first filling part formed on a region corresponding to a groove between a thumb and an index finger, and one portion of dorsal surface and palmar surface of the index finger; and
a second filling part formed on a region corresponding to one portion of dorsal surface and palmar surface of the thumb of the base part, and the thenar of the thumb of the palm,
wherein the first and the second filling parts provide a comparatively thicker area than a regular region of the base part corresponding to palmar surfaces of middle, ring, and little fingers ~~and a palm portion along the ring and little fingers, and~~
wherein the first filling part is not extended to an upper palm portion below the ring and little fingers.

12. (Original) The golf glove of claim 11, wherein the first filling part is extended to a wrist portion corresponding to a lower portion of the second filling part on the base part.

13. (Original) The golf glove of claim 11, wherein the first and the second filling parts are formed using at least one selected from a group consisting of leather, synthetic leather, and fabrics, so as to be attached to the base part by sewing or binding.

14. (Original) The golf glove of claim 11, wherein the first and the second filling parts include a resin coating layer that is bound to a portion corresponding to the base part by coating.

15. (Previously Presented) The golf glove of claim 11, wherein the second filling part is extended to a palmar portion of a second knuckle of the thumb portion.
